Ideation Phase Brainstorm & Idea Prioritization

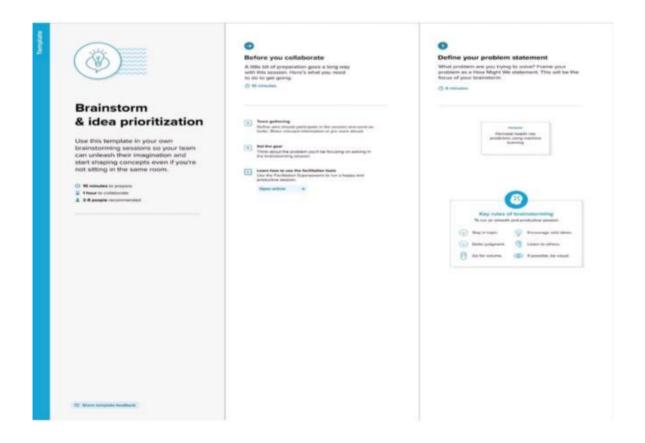

Date	06 May 2023
Team ID	NM2023TMID09663
Project Name	PERINATAL HEALTH RISK PREDICTORS USING MACHINE LEARNING
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization:

PERINATAL HEALTH RISK PREDICTORS USING MACHINE LEARNING:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Step-2: Brainstorm, Idea Listing and Grouping

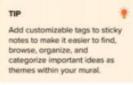

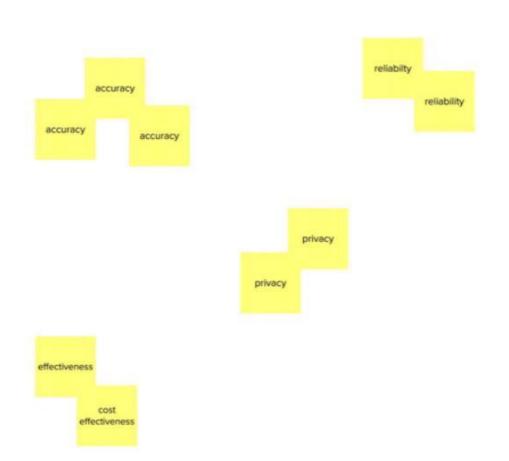

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you and break it up into smaller sub-groups.

Step-3: Idea Prioritization

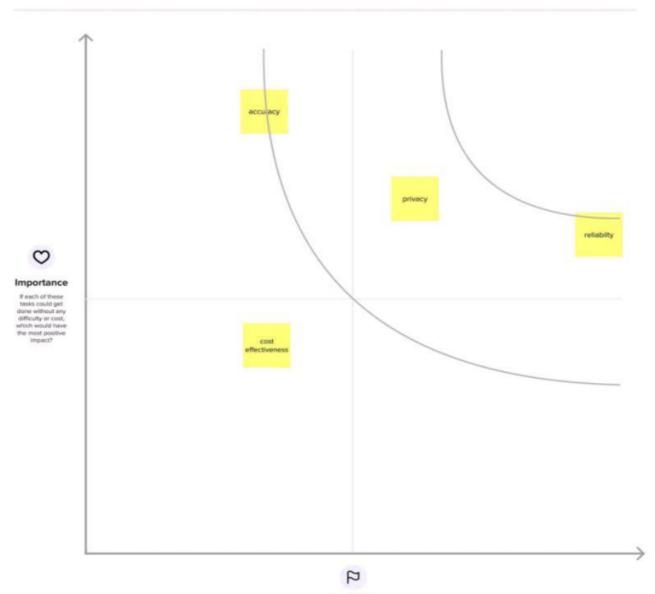

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

Participants can use their cursors to point at where sticky notes should go on the grid. The facilitator can confern the spot by using the laser pointer holding the Hkey on the keyboard.

Feasibility

Regardless of their importance, which tasks are more feasible than others? (Cost, time, effort, complexity, etc.)
